# Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

**Contrast** — These are opportunities to improve the legibility of your content.

Background and foreground colors do not have a sufficient contrast ratio.

Navigation — These are opportunities to improve keyboard navigation in your application.

Heading elements are not in a sequentially-descending order

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

Links do not have a discernible name

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn where in our guide on conducting an accessibility review.

## Progressive Web App

These checks validate the aspects of a Progressive Web App. Learn more.

#### Installable

Passed audits (10)

▲ Web app manifest or service worker do not meet the installability requirements — 1 reason
 PWA Optimized
 ▲ Does not register a service worker that controls page and start\_url
 ▲ Does not redirect HTTP traffic to HTTPS
 ▲ Is not configured for a custom splash screen Failures: No manifest was fetched.
 ▲ Does not set a theme color for the address bar.
 Failures: No manifest was fetched, No `<meta name="theme-color">` tag found.

Content is sized correctly for the viewport	~
Has a <meta name="viewport"/> tag with width or initial-scale	~
Provides a valid apple-touch-icon	~
▲ Manifest doesn't have a maskable icon No manifest was fetched	~
Additional items to manually check (3) — These checks are required by the baseline <u>PWA Checklist</u> but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
